A Vicious Cycle in Large IT Delivery

SAMPLE

Large IT delivery organizations face a vicious cycle at the enterprise level due to poor portfolio management

Enterprise Kanban Board Overview

SAMPLE

An Enterprise Kanban Board (EKB) is a work management tool that an IT organization can use to visualize its portfolio of projects; it provides an organization-wide view of available capacity and capabilities

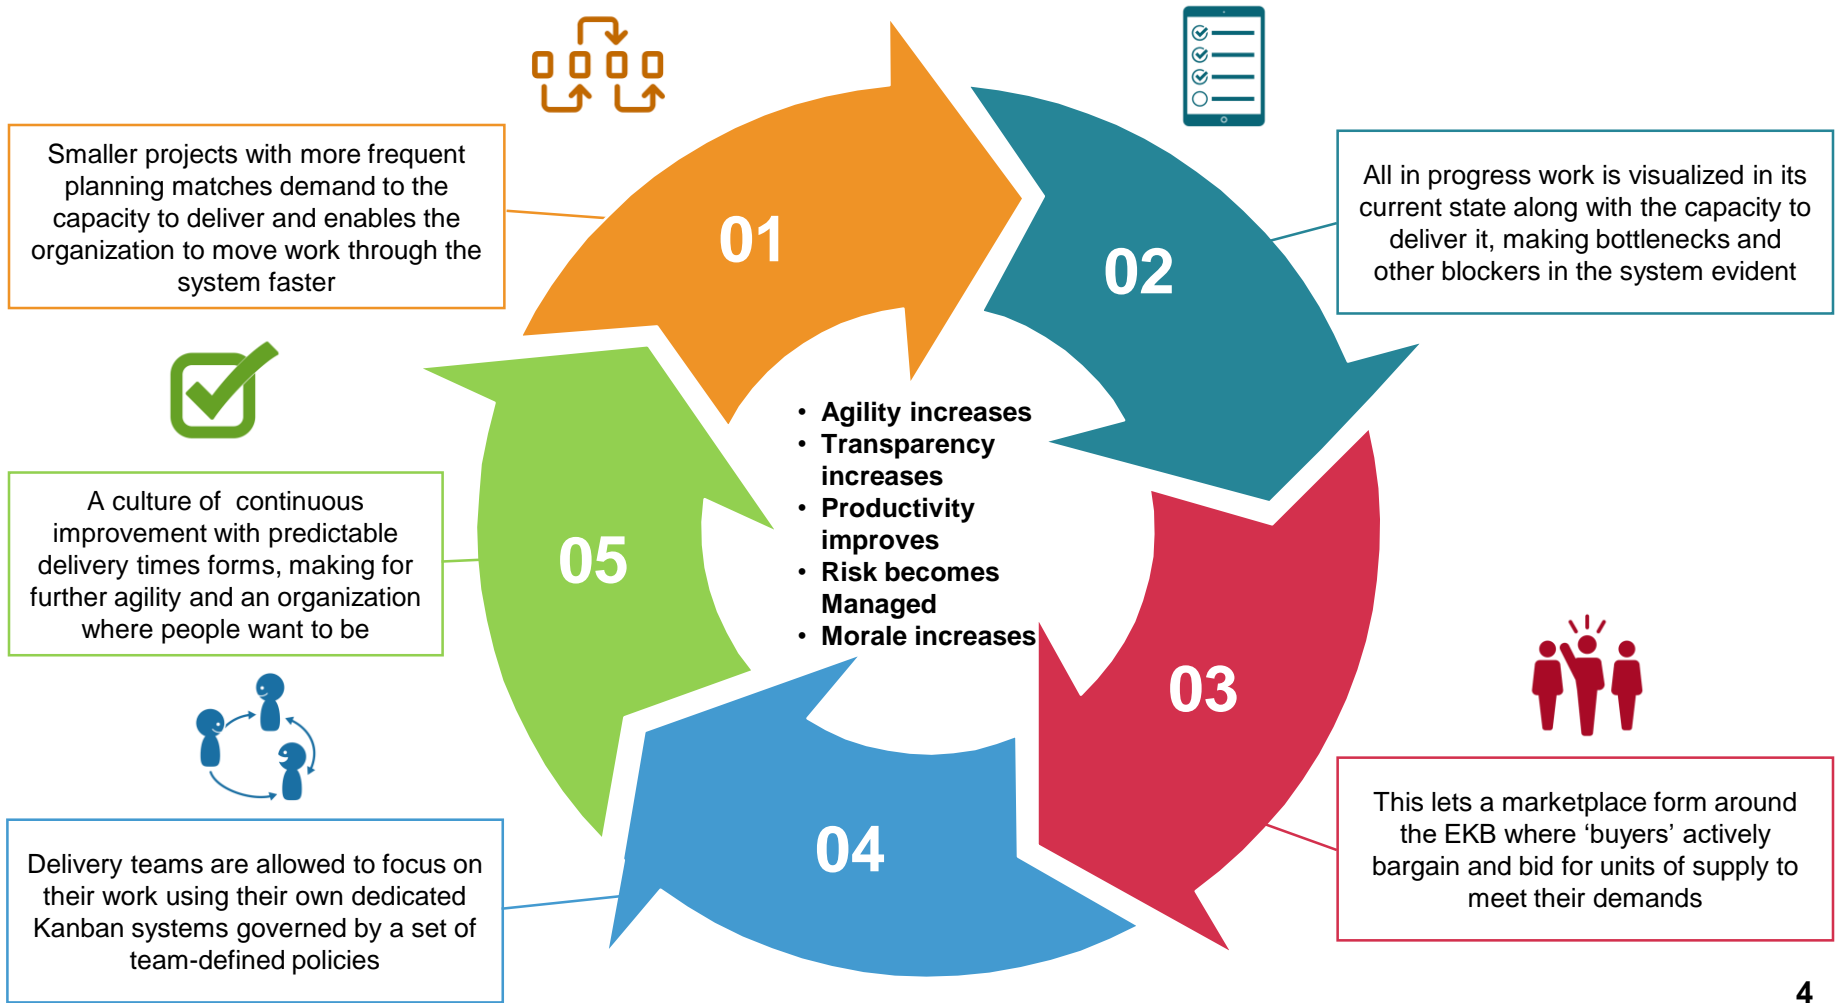

An EKB introduces a scarce, common unit of value which leads to effective decision making across prioritization, resource planning and issue escalation; it also moves an organization from budget based planning to throughput based planning

A Virtuous Cycle when Enterprise Kanban is Introduced

SAMPLE

Introducing Kanban at the enterprise level can create a virtuous cycle through effective portfolio management
